USER INSTRUCTION MANUAL

Should be used as part of an employee training program as required by OSHA and is intended to meet the manufacturers instructions as required by ANSI Z359.1

WARNING!

This product is part of a personal fall arrest system. The user must read and follow the manufacturers instructions for each component of the system. These instructions must be provided to the user of this product. The user must read and understand these instructions before using this product. Manufactures instructions must be followed for proper use and maintenance of this product. Alteration or misuse of this product, or failure to follow instructions may result in serious injury or death.

ANCHORAGE: The anchorage to witch this product is attached must be capable of sustaining a static load in the direction applied by the personal fall arrest system of at least 3600 lbs. With certification of a qualified person, or 5000 lbs. without certification. When more than one personal fall arrest system is attached to the same structure, the strength requirements stated above must be multiplied by the number of personal arrest systems attached to the structure.

PLAN: Your personal fall protection system before installing and using this equipment. Consider all factors affecting your safety during use of this equipment.

FREE FALL: Ensure adequate clearance exist in your fall path to prevent striking an object. When the safety retractable is anchored above, a minimum of 6ft. from the working level to the lower level or nearest obstruction is recommended, if anchored at feet level an additional 4 ft. Clearance is needed. Avoid working where your lifeline may cross or tangle with that of another worker. Do not allow the lifeline to pass under your arms or between your feet, never clip, knot, or otherwise prevent the lifeline from retracting.
